Precipitation probability					
70%	60%	60%	70%	70%	80%

Forecast for Sunday 28 Mar 2021

Weather: Cloudy with outbreaks rain through much of the day, the rain most persistent across western hills with eastern hills seeing generally lighter rain with some drier, perhaps brighter, interludes. Any lying snow thawing readily with conditions underfoot becoming very wet with swollen water courses.

Chance of cloud free mountain/hill tops above 800m: Little chance in west but nearer around 40% eastern hills at times through the day.

Visibility: Periods or persistent cloud above 450-600m, with patches below, becoming occasional or periods above 600-750m at times across eastern hills. Visibility away from cloud, hazy for a time in the morning and across eastern hills at times, otherwise just a few kilometres in rain, especially heavy rain.

Meteorologist's View

Wet day in west with heavy rain. Very windy with gusts, especially at first and again later around 80mph over ridges and summits.

Forecast for Monday 29 Mar 2021

Weather: Outbreaks of mostly light rain continue, especially in west, through much of the day but eastern and later southern hills largely dry with some warm sunny spells developing.

Maximum wind: Southwesterly 45-55mph, gusts around 75mph over ridges and summits, gradually decreasing 20-25mph, gusts 40mph.

Chance of cloud free mountain/hill tops above 800m: Little chance in the west but nearer 60% in the east and later south.

Visibility: Periods or persistent cloud above 450-600m, with patches below, in west but cloud more occasional in east and later south above 750m. Visibility, away from cloud, hazy falling several kilometres in rain, becoming good in east and later south.

Temperature: **Valleys:** Plus 9 Celsius rising to plus 13 Celsius in west by day but nearer 16 or 17 Celsius in east
At 800m: Plus 7 Celsius
Freezing level: Above summits
